

# CITY OF NEWPORT BEACH

December 5, 1989

TO WHOM IT MAY CONCERN:

A committee working under the direction of the Orange County Fire Chief's Association is currently writing a master plan to connect all fire stations in the county to a common video system.

Not only would this system enhance the training ability of local fire departments, the City would also have the ability to communicate to its citizens in the event of a major catastrophe. This system would provide the community with such information as evacuation routes, shelters, FEMA offices, etc.

Therefore, we endorse a County-wide interactive video program. We also support the selection of Communications Support Corporation to assist the Orange County Fire Chief's Association to solicit a grant to cover such costs.

Sincerely,

ROBERT L. WYNN  
City Manager

JAMES M. REED  
Fire Chief
